Green Power Partnership National Top 100

As of January 25, 2021, the combined annual green power use of EPA's Top 100 Partners amounts to more than 63 billion kilowatt-hours, which is equivalent to the annual electricity use of nearly 6 million average American homes.

As a health care provider, we have an obligation to operate in a manner that supports health in our communities and reduces our environmental footprint. By renewing and expanding this wind power purchase agreement, Kaiser Permanente is increasing its investments in cleaner energy. It's the right thing to do for our communities, and it makes good business sense.
- Ramé Hemstreet, Kaiser Permanente

Usage figures are based on annualized Partner contract amounts (kilowatt-hours), not calendar year totals. These rankings are updated on a quarterly schedule. Find out how your organization can [partner with EPA](#) today!

* Reflects the amount of green power as a percentage of total electricity use. Partners choosing to purchase green

power in an amount exceeding 100 percent of their U.S. organization-wide electricity use are listed as such.

° Indicates Provider is selling Partner a third-party certified green power product. [Get more information on third-party certification.](#)
